the most powerful and beneficent of beings, has forbidden you to take life by deceit, when it is not necessary for livelihood. (Qur'an-23:2) It is not through your hands that you have won anything, but it is through God that anything is won or lost (Qur'an-17:78) Indeed, your god is One God (there is no god but God-Al Nur-Ali) (Qur'

The Athan Software Crack Serial Number Full Torrent Latest

Introduction: Religion plays an important role in any society, regardless of belief, and it still does

so today. Different cultures use different prayer methods, with Islamic individuals having to go through six prayers throughout the day. In this regard, The Athan Software attempts to remind you when the main Islamic daily prayers are about to start. Modern and intuitive interface: The application mostly resembles a customizable alarm clock, but with several fixed conditions. In terms of visuals, the application sports a modern interface, with all features stored in a compact window which you can

further reduce in size to view only a clock and the upcoming prayer. All of the six prayers are displayed in the main window along with a clock with indicators fixed at the corresponding time, as well as the name. A useful feature is that the application can be set to automatically run at startup so you don't have to constantly check whether or not it's active. Multiple customization options: Furthermore, there are various customizable settings, ranging from text and hour format display, to time correction

and location options. This further increases practicality because it can be used by Islamic communities around the world, being fully synchronized. Enable sound alerts and time correction: Although settings come with a default configuration, you can choose which prayers to be alerted of. What's more, a WAV file can be attributed to each event so you recognize each event by the sound it plays. There's also an option to set the alarm to trigger several minutes before the actual event so you can

get ready. Set up calculation methods and regional settings: Regional settings further help adjust time discrepancies and calculation methods. An integrated option allows you to specify your exact location, either by choosing from several drop-down menus or bringing up a browser with Google Maps at the press of a button. In conclusion: To sum it up, The Athan Software is a handy application for Islamic communities that use the computer on a daily basis, with incredibly helpful

configuration options so you're always on time. It can also come in handy for public domains in order to better alert a larger majority of people. Thanks to its low system requirements, it can run on a wide array of configurations. The Athan Software Windows 10 Key For Free: The Athan Software works for Windows 7 and Windows 8.1, as well as Windows 8, Windows 10 and Windows 10 Pro. The installation process is simple, quick and totally free. In order to make a choice regarding which method of

installation you want, use

The Athan Software is meant to be a handy application for Islamic communities that use the computer on a daily basis, with incredibly helpful configuration options so you're always on time. It can also come in handy for public domains in order to better alert a larger majority of people. Thanks to its low system requirements, it can run on a wide array of configurations. @TheAthan Software keeps your computer closed at night, while

reminding you of when dawn and night prayers start. With an intuitive interface and a customizable alarm, it is suitable to use in any country and any time, no matter what the current time is. Athan is a creative application designed especially for Islamic communities around the world who use their computer on a daily basis. It keeps you informed of your prayer timings, as well as your next morning or afternoon meal, thus making it more practical to pray and eat in a timely manner. The application is primarily a

"prayer reminder", with a modern interface and the ability to set your alarms. The application can be set to automatically run at startup, with a variety of customizable settings. The application has a built-in local device indicator, which is configured based on your location. Likewise, your prayer timings are automatically determined based on the time difference between your current location and the prayers location. Furthermore, when you enter a city the app will notify you of prayer timings for that specific

location. There are also a variety of configuration settings to ensure a more flexible use of the application. The Athan Software supports multiple event notification methodologies, with the ability to specify how you want to be notified of your pending events. What's more, the application can be used for a variety of different purposes, with multiple customization options. Three religious settings can be used, thus allowing the application to be used in communities that practice them as well as other religions.

Furthermore, setting the local time to the prayer time, as well as the time taken to reach that prayer time are also available. Athan is a very easy to use prayer timer for the Muslim community, and since it is available as both a portable application (that doesn't require installation) and a web application (that requires installation on your computer), it can be a practical way to manage time for any activity. A simple and useful prayer timer that reminds you when dawn and night prayers start, with an intuitive and

customizable user interface. Compatible with any OS that has
