DQ: Removing default cookies When we set cookie in the view we use if (Request. IsCookieRequest) { } instead of if (Request. IsCookieRequest) { Response. Cookies. Add (cookie); } How to replace it when implementing the controller's OnActionExecuting()? A: I can't be sure without more details, but

I think you're thinking too much about the code in the view. From what I can gather, a controller action can create and set cookies on the response if it wants to. The view is just a view of the cookies. It wouldn't make much sense to show a view to the user if the user can't see the cookies. Q: How to use a regex in a UI? I was wondering if anyone has any advice on how to approach this sort of problem? I'm trying e79caf774b
