Q: How to write maven plugin on my own? What is Maven Plugin API? How to write a Plugin in maven? Help me please. A: What is Maven Plugin API? How to write a Plugin in maven? It's not a API; it's a convention. As it's already mentioned in @usr's answer, you can search for 'Maven Plugin' in the plugin manager's documentation or just look at plugins which have already implemented the convention. If you really, really want to write your own plugin, you can do it. But it's not as simple as you might think: You cannot use plain Java (in fact, the Maven Java Plugin is built using ANT). You need to use other things such as the Apache Ant API or the Mojo API to write Maven plugins. The Maven build runs on a single machine, so there's no need to care about distributed builds or developing the plugin architecture right. #13) - Swiss of the Month #9 Name: The King Of Bulls and The Queen Of Elephants Age: 36 Birth Date: March 21, 1989 Birthplace: Patna, Bihar, India Are You: A fan of marketing?
