Our halls are fully accessible and provide the best facilities to cater for your child's needs during a visit. We have a secure car park where all cars are automatically parked in a designated area at the beginning of each school day. Please note that all visits are unsupervised and children should be accompanied and supervised by their parents, unless they have a confirmed timetable with a teacher or an appointment with a department head or a social worker. Please contact the school office if you need an escort for your child in our school. The school is always happy to help if you do not know how to drop your child off in the morning. Please note that parents are not permitted to be in the playground while the children are playing. There is a designated area for parents to use, but only during appropriate times. the end of the first quarter, China actually lost ground to the United States by 12.1 million tons. In the end of the second quarter, it fell back by another 2.5 million tons. In the end of the third quarter, it lost another 4.3 million tons, which pushes its deficit for the whole of the fiscal year to a whopping 8.9 million tons. At the same time, we have to remember that in the first three quarters of 2014, the United States imported 5.5 million tons of coal, which was more than what it imported in 2012. This means that even if China has sharply reduced the size of its trade surplus with the United States, it still imports more coal from us than it exports to us. Chronic inflammatory demyelinating polyradiculoneuropathy complicating systemic lupus erythematosus. The literature contains only a single case report of chronic inflammatory demyelinating polyradiculoneuropathy (CIDP) occurring in a patient with systemic lupus erythematosus (SLE). The patient, a 38-year-old man, was diagnosed with CIDP 10 years after the onset of SLE. The relationship between the two disorders remains unclear. Only those patients who have multiple sclerosis (MS) antibodies in the cerebrospinal fluid (CSF) and in the blood are at risk of having coexistent MS. In the presence of myelin oligodendrocyte glycoprotein (MOG) antibodies, this risk is estimated to be as high as 50-70% when both MS antibodies are present simultaneously. In our patient, both MS and SLE antibodies were detected in the CSF. Based on these findings, it is likely that the two disorders were coexistent, although it is still possible that the clinical manifestations of MS preceded those of CIDP.Q: Boundedness of  $p$ -adic  $L$ -functions Let  $S$  be a finite extension of  $\mathbb{Q}_p$ .
