This is a game jam created to help you fix the glitches, before the game is released. - Gravity Inversion - High-definition Trees - Bullet Orbs - Death Throats - Many more... Tags: Powered By Tomonobox Write a few lines about yourself: Hi there, I'm Wesley. I'm a JS programmer and this is my first game jam. I've tried to make a clone of the game Glitchy that I enjoyed so much when I was a kid, but unfortunately it turned out a bit buggy. This is my second attempt, and I think this time it will be better. As a JS developer and game programmer, I'm pretty comfortable with node and for now I'm trying to learn some other stuff like socket.io, but I'm sure I'll be able to use it for my next games. Oh and sorry if the sound disappears for a few seconds (that was supposed to happen). This is my first game jam and I'm pretty excited to see that my baby is under the process of being released and that people are still playing my game (I'm getting a bit sad with it, so this is a bit of a good news for me). I'm a complete beginner in the world of programming, and I did my best to learn everything I needed to make this game but unfortunately I'm still not there yet. This is the reason why I did a 2nd attempt, to add new features and fixes. What I'm working on now is a new terrain generation system and maybe will add some other things such as bosses, enemies, etc.. and of course, many optimizations. I'm quite proud of what I did in this game, so this is my 2nd Game Jam Product and I was able to use everything I learned. I have contacted a few of my friends to help me fixing the few remaining

bugs, and maybe will add some assets during my next week. We are tired of the way that the world is run and would like to make a change. You are a hero who wants to do something about it. Collect all of the gemstones that the world throws at you. Fight the creatures that inhabit it. Rescue the

Battle your way through a multitude of World of Tanks Blitz game modes like - Conquest, Escort, Team Deathmatch, Search and Destroy, team battle and the stand-alone Long War mode. Choose from a huge selection of vehicles, in tiers ranging from Tier 1 to Tier X, including the top tanks of the new Battle in China Campaign that were introduced in the 3.3 Update. Get the best results by practicing your tactics and perfecting your team play in the Practice Range and by joining the Blitz Community

where you can take on other clans in Global and Squad battle modes. The elements of Blitz are being balanced all the time. After reaching certain experience or level caps, the game introduces new game mechanics that will strengthen the team battle game mode, such as destroying a tank on the premise of capturing a location and the Coop Defense mode - where you build a team of players who defend an important location against attackers, who must earn the right to capture it. Elaborate game modes and visual effects are also being added continuously. Recently, a new feature for World of Tanks Blitz - Command Center, has been added, which offers the vehicle crews their own screens during battle where they can prepare their next tactical move. Build your own epic battle tank! - Take on the role of a team leader and decide which tank to bring to battle in the unique Team Battle mode. Furious Ground Combat - With persistent vehicle-to-vehicle action, deep real-time physics, and large-scale battles, the unmissable Open World features epic combat and adrenaline-pumping moments! An award-winning game for all war fans, it allows you to combine combat and defence together - from individual tank battle to massive ground invasion against the enemy team. What's new:

! (Classical Version) As you may or may not be aware, the "Introducing Awesomenauts" patch will alter gameplay in a rather substantial manner, allowing for the return of plumbob and allowing for new weapons and mobility mechanics. I have been overplaying with the "Clunk" skin and

decided to release a classical version of it in order to provide an interface closer to how this skin has been used throughout the life of Awesomenauts. Effect: Remove collision for the player himself. Known Issues: No abilities that aren't active. If teammates are already talking to you then they will only talk if they see you.
